Ambient Light Sensor – Surface Mount
EAALSTIC1708A0

Features
- Close responsively to the human eye spectrum
- Light to Current, analog output
- Good output linearity across wide illumination range
- Low sensitivity variation across various light sources
- Guaranteed temperature performance, -40°C to 85°C
- Wide supply voltage range, 2.5V to 5.5V
- Size: 1.7mm(L)*0.8mm(W)*0.6mm(H)
- RoHS compliant and Pb Free package
- Compliance with EU REACH.

Description
The EAALSTIC1708A0 is a low cost ambient light sensor, consisting of phototransistor in miniature SMD. Everlight Americas ALS series products are a good effective solution to the power saving of display backlighting of mobile appliances, such as the mobile phones, NB and PDAs. Due to the high rejection ratio of infrared radiation, the spectral response of the ambient light sensor is close to that of human eyes.

Applications
- Detection of ambient light to control display backlighting
  Mobile devices – mobile phones, PDAs
  Computing device – TFT LCD monitor for Notebook computer
  Consumer device – TFT LCD TV, plasma TV, video camera, digital camera, toys
- Automatic residential and commercial management
- Automatic contrast enhancement for electronic signboard
- Ambient light monitoring device for daylight and artificial light
  – Street light, CCD/CCTV

Note:
1. White Fluorescent light (Color Temperature = 6500K) is used as light source. However, White LED is substituted in mass production.
2. Illuminance by CIE standard illuminant A / 2856K, incandescent lamp.
Typical Electro-Optical Characteristics Curves

**Ev = 100 Lux
Converting Photocurrent to Voltage

\[ V_{\text{out}} = I_{\text{ph}} \times R_L \]
\[ V_{\text{out}}(\text{saturation}) = V_{\text{cc}} - 0.4V \]

3. To avoid 60Hz ripple from fluorescent lamps, we suggest that the time constant must be greater than 0.5 second:
\[ R_L \times C_L \geq 0.5 \text{ (empirical data)} \]
Carrier Tape Dimensions: Loaded Quantity 4000 pcs Per Reel

Note: Tolerances unless mentioned ±0.1mm. Unit = mm

Recommended method of storage

Reflow Terms: JEDEC Level 4 Specification

Dry box storage is recommended as soon as the aluminum bag has been opened prevent

1. Over-current-proof

   Customer must apply resistors for protection, otherwise slight voltage shift might cause big current happen. (Burned-out might happen).
2. Storage

(1) Do not open moisture proof bag before components are ready to use.

(2) Before opening moisture proof bag, components should be kept at 30°C or less and
    90%RH or less.

(3) Components should be used within a year.

(4) After opened moisture proof bag, components should be kept at 30°C or less and
    70%RH or less.

(5) Components should be used within 72 hours after opened moisture proof bag.

(6) If the moisture absorbent material (silica gel) has faded away or the components
    have exceeded the storage time, baking treatment should be performed using the
    following conditions. (Baking treatment: 60±5°C for 24 hours)

ESD Precaution:

Proper storage and handing procedures should be followed to prevent ESD damage to the devices
especially when they are removed from the anti-static bag. Electro-Static Sensitive Devices warning
labels are on the packing.

Recommended solder profile

Notice:
1. Reflow soldering should not be done more than two times.
2. When soldering, do not put stress on the devices during heating.
3. After soldering, do not warp the circuit board.
Soldering Iron

Each terminal is to go to the tip of soldering iron temperature less than 350°C for 3 seconds within once in less than the soldering iron capacity 25W. Leave two seconds and more intervals, and do soldering of each terminal. Be careful because the damage of the product is often started at the time of the hand solder.

Repairing

Repair should not be done after the device have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of the device will or will not be damaged by repairing.

Note:

1. Above specification may be changed without notice. Everlight Americas will reserve authority on material change for above specification.

2. When using this product, please observe the absolute maximum ratings and the instructions for using outlined in these specification sheets. Everlight Americas assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets.

3. These specification sheets include materials protected under copyright of Everlight Americas Inc. Please don't reproduce or cause anyone to reproduce them without Everlight Americas’s consent.
